# FOREWORD

Dear Members, Friends, and Supporters of the Foundation for Environmental Education,

It is our great pleasure to present to you our 2022 Annual Report, highlighting the progress and achievements of the Foundation for Environmental Education (FEE) over the past year. As we continue to face unprecedented environmental challenges, we are more committed than ever to protecting our planet and its natural resources.

Throughout 2022, FEE and its members have worked tirelessly to continue growing the five FEE programmes and promote sustainable policies and practices at local, national, and international levels. In line with our strategic plan, GAIA 20:30, we continued to focus our activities on empowering climate action, protecting global biodiversity and reducing environmental pollution. We also immersed ourselves in strengthening existing and cultivating new partnerships, recognizing the critical role these play towards achieving our common goal of a sustainable future for all.

FEE was represented at several international events such as the UNFCCC Bonn Climate Change Conference, the 2022 UN Ocean Conference, COP27 in Sharm el-Sheikh and the UN Biodiversity Conference in Montreal. Thousands of stakeholders from all five programmes also took action to protect biodiversity around the world as part of our year-long GAIA 20:30 Biodiversity Campaign. The latter half of 2022 was dedicated to Running Out of Time (ROoT); an inspiring 40-day non-stop relay race from Glasgow to Sharm el-Sheikh. It was incredible to see the commitment and efforts of our FEE members who went above and beyond to organize baton handover events, help recruit runners and cyclists, support the call for climate education and get hundreds of schools to participate in the Global Schools Action Day. Alongside many fantastic partners, Running Out of Time undeniably illustrated that by working together we can achieve seemingly impossible feats.

The tremendous work of FEE's members on the ground, combined with FEE's global public education and advocacy campaigns and the support of our many different partners represents significant progress towards achieving our three strategic goals laid out in GAIA 20:30. It has also served to strengthen FEE's position as a leader in climate change education, protecting biodiversity and tackling environmental pollution.

In 2023, we are looking forward to working alongside our members and partners in key projects such as UNESCO's Greening Education Partnership and the UN Decade on Ecosystem Restoration's Education Challenge. At the same time, FEE will be promoting significant change and accountability through the commitment of FEE's sustainable tourism programmes to the Glasgow Declaration headed by the World Tourism Organization (UNWTO).

Looking ahead, we recognize that our work is far from over. Climate change, biodiversity loss, and pollution continue to threaten our planet and its inhabitants. But with your continued support, we are confident that we can make a difference. Together, we can build a more sustainable and equitable world for ourselves and for future generations.

**Daniel Schaffer**  
FEE Chief Executive  
Officer

**Lesley Jones**  
President, FEE Board of  
Directors

# OUR STORY SO FAR

## OUR VISION

A sustainable world in which Education for Sustainable Development (ESD) and Environmental Education (EE) create positive change for all.

## OUR VALUES

Our values are at the heart of everything we do.

**Action:** We engage in positive educational activities.

**Cooperation:** We involve our stakeholders in the activities.

**Excellence:** We strive for quality in all activities.

**Transparency:** We are responsible and accountable.

**Democracy:** We use democratic decision-making processes.

## OUR STRATEGY

In 2021, the Foundation for Environmental Education ratified its new, 10-year strategic plan, named GAIA 20:30. GAIA 20:30 identifies three overarching goals – empowering climate action, protecting global biodiversity and reducing environmental pollution. Progress towards these goals will be achieved through actions in our programmes, campaigns, and global activities across six cross-cutting areas: Education, Advocacy, Projects, Partnerships, Support, and Accountability.

## OUR MISSION

To engage and empower people to address climate change, biodiversity loss, and pollution through Education for Sustainable Development (ESD) and Environmental Education (EE) in collaboration with our members and partners worldwide.

# OUR GLOBAL NETWORK

The Foundation for Environmental Education (FEE) is a global, membership-based, not-for-profit organisation. In 2022, we had 104 members across 81 countries responsible for implementing one or more of the five FEE programmes – Blue Flag, Green Key, Eco-Schools, Learning about Forests and Young Reporters for the Environment – in their country. The overall coordination of FEE’s work is undertaken by the team at the FEE Head Office in Copenhagen, Denmark.

## AFRICA

**Burundi:** Initiative for Rural Health Promotion and Integrated Development (IPSDI)

**Cape Verde:** Biosfera 1 - Associação para Defesa do Meio Ambiente

**New Zealand:** Keep New Zealand Beautiful

# HIGHLIGHTS FROM OUR PROGRAMMES

FEE's five international programmes: Blue Flag, Green Key, Eco-Schools, Learning about Forests and Young Reporters for the Environment continued to see success and growth throughout 2022.

Credit: ABAE, Portugal

## BLUE FLAG

The Blue Flag programme celebrated 35 years of promoting holistic sustainability practices across beaches, marinas and tourism boat operators around the world!

**5,066** AWARDED SITES

**50** COUNTRIES

## GREEN KEY

In 2022, Accor, BWH Hotel Group, and Ascott Hotels, among others, entered new cooperation agreements with Green Key, contributing to the overall increase of over 900 establishments in the programme.

**3,700** CERTIFIED ESTABLISHMENTS

**60** COUNTRIES

Credit: Shepherd's Inn, Trinidad and Tobago

# HIGHLIGHTS FROM OUR PROGRAMMES

## ECO-SCHOOLS

The Eco-Schools programme engaged over 48,000 schools in educational activities and global campaigns that supported learning about biodiversity, tackling pollution and calling for climate change education.

**22,386,678**  
STUDENTS

**73**  
COUNTRIES

*Credit: YRE China*

*Credit: Eco-Schools Morocco*

**430,176**  
STUDENTS

**43**  
COUNTRIES

## YOUNG REPORTERS FOR THE ENVIRONMENT (YRE)

The Young Reporters for the Environment programme's annual competition was the largest one yet, with over 12,900 photographs, 2,000 videos and 7,600 articles submitted from youth around the world!

# HIGHLIGHTS FROM OUR PROGRAMMES

Credit: TEREZA, Czech Republic

## LEARNING ABOUT FORESTS (LEAF)

The Learning about Forests programme compiled and published nine creative lesson plans and best practices on biodiversity from the global LEAF network as well as developing the online course Outdoor Education: Using Nature as a Classroom.

# OUR PROJECTS

The Litter Less Campaign (LLC) entered its fifth phase in 2022 across a total of 21 countries! Seven countries participated through Eco-Schools and four through the YRE programmes, with an additional ten schools joining the global campaign through key partners – UNESCO’s Associated Schools Network and the World Organisation of Scouts Movement. In April 2022, FEE also published a [report](#) that highlighted the impacts of LLC as it relates towards Education for Sustainable Development.

Running for over five years, the **Alcoa Warming-Waste-Water-Watts-Wildlife (W5)** project launched a new phase in 2022, focusing on a total of 20 Eco-Schools split between Norway (FEE Norway) and the United States (National Wildlife Federation (NWF)). This phase of the Alcoa W5 project saw the creation of an online course for educators about the Sustainable Development Goals. In 2022, over 130 participants took the course, with a completion rate of 20 per cent. [Learning & Teaching about the SDGs](#) is now available for free on FEE Academy in English, Spanish, French and Norwegian.

In October 2022, FEE was honoured to receive the [Pratt & Whitney Global E-STEM Award](#) to further develop the **Eco-Schools Project Advancing Circular Economy (E-SPACE)** project, which supports educators in teaching their students about the circular economy, renewable energy, and waste reduction. E-SPACE was initially piloted in Latvia and Slovenia and will now expand to 80 schools in eight countries across South America, Africa, and Asia.

*Credit: Alcoa W5 Project at Turtle Creek, USA*

# OUR PROJECTS

Credit: GIZ Cambodia

Announced at the end of 2022, FEE joined two Horizon Europe projects – **BioBeo** and **PLAN'EAT**. Delivered by 15 partners across 10 countries, BioBeo will develop and deploy educational resources to enhance understanding and engagement across society regarding lifestyle, circularity and bioeconomy. PLAN'EAT is a research project that will be delivered by 24 partners over the next four years. It aims at transforming food systems and food environments towards healthy and sustainable dietary behaviour.

2022 ended on a good note, with FEE signing the collaboration agreement with the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) for the **Improved Competitiveness of National Enterprises (ICONE)** project in Cambodia. This innovative project engages both the Green Key and FEE EcoCampus programmes to support the development of sustainable tourism in Cambodia through education and capacity-building in the hospitality sector.

The Blue Flag programme partnered with the **Living Ports** project in the Port of Vigo to help bridge the gap between EConcrete's bio-enhancing concrete installations and the public by developing Shipyards immersive educational content about biodiversity, noise pollution, and local bathymetry as part of the port's underwater observatory, the Nautilus.

# OUR STRATEGIC GOALS

Our three strategic goals are at the heart of the work we and our global FEE members do.

**EMPOWER  
CLIMATE  
ACTION**

**PROTECT  
GLOBAL  
BIODIVERSITY**

**REDUCE  
ENVIRONMENTAL  
POLLUTION**

# EMPOWERING CLIMATE ACTION

**The need to address climate change is more urgent than ever.** 2022 was the world's sixth warmest year on record and the concentration of carbon dioxide (CO2) in our atmosphere hit a new record of 421 parts per million.

Over the past year, FEE and its programmes have worked through various channels to empower climate action.

## PROGRAMME ACTIVITIES

Due to the cross-cutting nature of the causes and consequences of climate change, all five programmes play a key part in educating and engaging stakeholders in climate action. In the Green Key programme, new criteria took effect in 2022. For example, Criterion 1.6 makes it imperative that hotels and hostels calculate their carbon footprint using a carbon measurement tool. In the Eco-Schools programme, 40 per cent of FEE members ran activities that aimed to increase climate change knowledge to drive impactful action, while in the international YRE competition, 18 per cent of entries addressed climate change.

A 3-year environmental education and tree planting project in Kenya, funded through FEE's carbon compensation initiative, the Global Forest Fund, truly blossomed in 2022. Students participating in the project were even featured in the news! Last year also saw the launch of the GAIA Fellowship, an intensive mentorship programme developed by the FEE Head Office to support young professionals in implementing environmental projects in their community.

Credit: [Kenya Organization for Environmental Organization](#)

# EMPOWERING CLIMATE ACTION

## CAMPAIGNS

FEE had the honour of being a principal partner of Running Out of Time, a truly one-of-a-kind relay race from Glasgow, host of COP26, to Sharm el-Sheikh, host of COP27. This non-stop, 40-day relay crossed through 18 countries, 14 of which FEE members played a critical role in organizing hand-over events, recruiting runners and cyclists, and engaging schools, hospitality establishments and more in the journey. Central to Running Out of Time was the call for universal, quality climate change education which over 836,000 people supported. The Global Schools Action Day saw 776,611 students from 2,230 schools in 105 countries take part. More than half of these schools (1,438) were part of FEE's global network.

## EVENTS

2022 started off with the World Environmental Education Congress in the Czech Republic, where the YRE International Director and several Young Reporters from the region actively participated in the Youth Congress, around the theme of Building Bridges in Times of Climate Urgency. The Blue Flag programme represented FEE at the UN Ocean Conference in Portugal, hosting a side event that focused on the power of harnessing networks at the local level for community empowerment and for the generation of positive social and environmental impact in the surrounding coastal context. FEE wrapped up the year at COP27 in Egypt, not only celebrating the incredible achievements of the Running Out of Time relay but continuing to call for universal, quality climate change education through side events. Three Young Reporters attended COP27 to report live on the event.

## PARTNERSHIPS

In May of 2022, FEE signed the Glasgow Declaration for the Decarbonisation of the Tourism Sector, a voluntary commitment that aims to combat climate change in the tourism sector. The Declaration was initiated by UNWTO in collaboration with the Travel Foundation and was launched at the [UN Climate Change Conference \(COP26\)](#). Through the Blue Flag and Green Key programme, FEE is committed to supporting the global commitment to halve emissions by 2030 and reach Net Zero as soon as possible before 2050, deliver climate action plans and align future plans with the five pathways of the Declaration (Measure, Decarbonise, Regenerate, Collaborate and Finance).

# PROTECTING GLOBAL BIODIVERSITY

**Wildlife populations have declined by an average of 69 per cent in the past 50 years.** Protecting biodiversity at local, regional and global levels occurs across all five programmes and through the work of many FEE members.

## PROGRAMME ACTIVITIES

In 2022, best practices in biodiversity protection and ecosystem restoration from the FEE network were collected and highlighted through social media as part of FEE's GAIA 20:30 Biodiversity Campaign. Blue Flag shared best practices from Mexico to Turkey to Norway and more. A best practice competition among the global Eco-Schools, LEAF and YRE network awarded schools in Germany, India, Cyprus, The Bahamas and Spain for their efforts to protect local biodiversity. In Green Key, additional criteria to protect and promote biodiversity also took effect in 2022. On the International Day of Forests, we launched the GAIA 20:30 Biodiversity Course on FEE Academy with great success! To date more than 400 participants have joined the course, with 25 per cent going on to receive the course certificate.

## CAMPAIGNS

The GAIA 20:30 Biodiversity Campaign came to an end in August 2022 after a year of amazing engagement from across the FEE network. The second edition of the biodiversity quiz was made available in 14 languages with the support of our FEE members and has been taken over 4,000 times. The webinar series organised by the Blue Flag and Green Key programmes saw over 300 participants. We received 41 lesson plans from 15 countries in the Eco-Schools, LEAF and YRE network and awarded four for their creative and experiential approach. In 2022, our annual 10-day Global Action Days campaign focused on five activities that increased knowledge and action around biodiversity protection. We received an incredible 1,312 registrations from 73 countries, and over 150,000 estimated participants! The positive response to the campaign laid the groundwork for future public education campaigns.

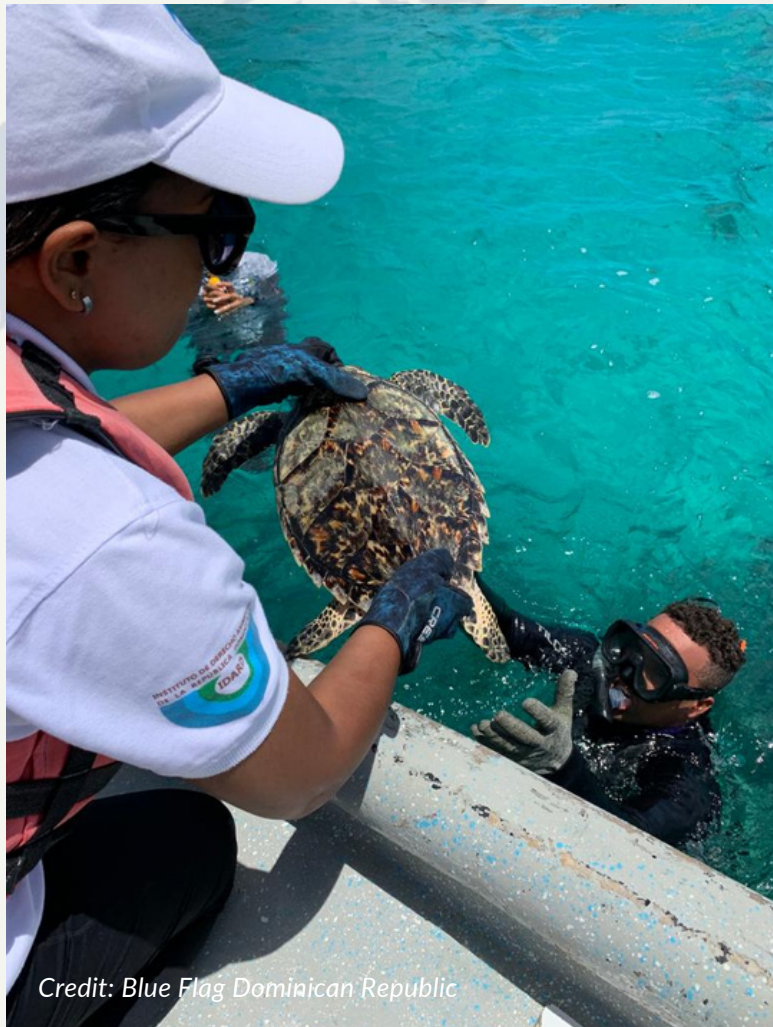

# PROTECTING GLOBAL BIODIVERSITY

## EVENTS

To wrap up the year, FEE attended the UN Biodiversity Conference (COP15) in Canada which ended with a landmark biodiversity agreement.

Credit: Blue Flag Dominican Republic

Credit: Hyvärilä Youth Centre, Finland

## PARTNERSHIPS

FEE became a Supporting Partner of the UN Decade on Ecosystem Restoration, solidifying our commitment to protecting global biodiversity. FEE's engagement with the UN Decade on Ecosystem Restoration extends through our global network, where many FEE members have already been actively restoring ecosystems for years, both separately and through the FEE programmes. The significant contribution to ecosystem restoration by our FEE members is regularly highlighted through articles shared across FEE channels.

# REDUCING ENVIRONMENTAL POLLUTION

**Today, we produce about 400 million tonnes of plastic waste every year.** Approximately 36 per cent of all plastics produced are used in packaging, including single-use plastic products for food and beverage containers, approximately 85 per cent of which ends up in landfills or as unregulated waste.

The effort to reduce pollution of all types has been ongoing for decades and is a long-standing objective of FEE's programmes and activities.

*Credit: Eco-Schools Netherlands*

## PROGRAMME ACTIVITIES

Over the years, the issue of pollution has been addressed through programme criteria and activities as well as projects such as the Litter Less Campaign, the Alcoa Warming-Waste-Water-Watts-Wildlife (W5) and the Eco-Schools Project Advancing Circular Economy (E-SPACE) project. In 2022, 44 per cent of global Eco-Schools activities were aimed at reducing litter and waste, while 43 per cent of global LEAF activities promoted responsible production and consumption. In the 2022 YRE competition, 31 per cent of submissions addressed pollution. Green Key has also strengthened and added criteria to increase its impact on pollution by, for example, making it imperative that 75 per cent of the chemical cleaning products used daily by an establishment must have a recognised eco-label.

There continues to be a need to increase awareness about not only reducing litter and waste but also promoting responsible production and consumption, being able to recognise invisible pollutants and familiarising people with the circular economy concept. Our online learning platform, FEE Academy, has been a critical tool in educating the FEE network and the general public about these topics through courses such as the GAIA 20:30 Pollution course and the GAIA 20:30 Circular Economy course. Both courses have been well-received with over 30 per cent of participants receiving a course certificate.

# REDUCING ENVIRONMENTAL POLLUTION

## PARTNERSHIPS

The Litter Less Campaign grew in 2022 through new partnerships with the UNESCO Associated Schools Network (ASPnet) and the World Organization of the Scout Movement (WOSM). Blue Flag also joined two innovative, new partnerships with Poralu Marine and The Searial Cleaners, to promote the use of robots for the environmental and waste management of beaches and marinas. Green Key has continued its partnerships with Werner-Mertz and Ecolab and entered a new partnership with Reza Hygiene, supporting Green Key's global efforts on reducing pollution, especially related to invisible pollutants in cleaning products.

# GAIA 20:30 AT A GLANCE

Through the five FEE programmes and the on-the-ground efforts of the FEE members, progress towards achieving the three strategic goals of GAIA 20:30 has been made.

THERE WERE  
**2,188**  
USERS ON FEE ACADEMY  
BY THE END OF 2022.

**16** WEBINARS  
HELD FOR  
**1,763**  
PARTICIPANTS

GLOBALLY, BLUE FLAG MEMBER  
ACTIVITIES RELATED

**48%** TO EMPOWERING  
CLIMATE ACTION

**62%** TO REDUCING ENVIRONMENTAL  
POLLUTION

**64%** TO PROTECTING GLOBAL  
BIODIVERSITY

GLOBALLY, GREEN KEY MEMBER ACTIVITIES RELATED

**38%** TO PROTECTING  
GLOBAL  
BIODIVERSITY

**53%** TO REDUCING  
ENVIRONMENTAL  
POLLUTION

**57%** TO EMPOWERING  
CLIMATE ACTION

# GAIA 20:30 AT A GLANCE

ACROSS ALL THREE EDUCATION PROGRAMMES,

**4,010**

TRAINING SESSIONS, WORKSHOPS, OR WEBINARS RELATED TO CLIMATE CHANGE, BIODIVERSITY OR POLLUTION WERE HELD FOR OVER

**14,000** AND **207,500**  
TEACHERS STUDENTS

Credit: Studios Photogénies/Teragir, France

Credit: YRE Morocco

**193** RESOURCES FOR TEACHERS

**381** RESOURCES FOR STUDENTS

ABOUT CLIMATE CHANGE, BIODIVERSITY OR POLLUTION WERE DEVELOPED IN 2022.

# GAIA 20:30 AT A GLANCE

GLOBALLY, ECO-SCHOOLS MEMBER ACTIVITIES RELATED

**44%** TO REDUCING LITTER AND WASTE

**40%** TO INCREASING CLIMATE CHANGE KNOWLEDGE TO DRIVE IMPACTFUL ACTION

**38%** TO PROMOTING RESPONSIBLE PRODUCTION & CONSUMPTION

GLOBALLY, LEAF MEMBER ACTIVITIES RELATED

**64%** TO PRESERVING EXISTING AND CREATING NEW FORESTS OR NATURAL AREAS

**46%** TO INCREASING CLIMATE CHANGE KNOWLEDGE TO DRIVE IMPACTFUL ACTION

**43%** TO PROMOTING RESPONSIBLE PRODUCTION & CONSUMPTION

LASTLY, IN THE 2022 YRE INTERNATIONAL COMPETITION

**31%** OF ENTRIES ADDRESSED POLLUTION

**18%** OF ENTRIES ADDRESSED BIODIVERSITY LOSS

**15%** OF ENTRIES ADDRESSED CLIMATE CHANGE

*(And 27% of entries addressed two or more of the themes above!)*
